- **Languages:** Python, Javascript, HTML, CSS, Jquery . / OAuth , EJS, JSX.
- **Frameworks/Libraries:** React, Node.js, Express.js, Django, AWS.
- **Databases:** MongoDB/ Mongoose , SQL/ PostgreSQL.

Software Engineer Experience

Sweet Treats Creations | Inspired about helping grow my cousin's small business , I developed a tailored ecommerce website , where all visitors and users are able to view different custom desserts available to enjoy on any occasion . It's currently a fully functional MERN-Stack Site.

While building the app , I utilized React as front end , connecting it to the backend with the express framework . It was great to apply React Bootstrap for styling . As a database to save all the data I used MongoDB . Additionally I protect users accounts using Token Based Authentication . At present , I'm working on extra features such as : use an API for payment , include a Virtual Assistant and mobile-friendly experience .

Market Urself | Built a full stack application collaborating with other partners developers during the General Assembly Program . The main focus of this app is to help local market vendors expose their products to more buyers , without needing to attend farmers markets events. We used Python as our primary language , Django and PostgreSQL to connect all the great features available on the app . Besides using Materialize CSS and Heroku to offer a better user experience.

Visit *Market Urself*

True-Fitness App | Developed a full stack application utilizing technologies such as Node JS , Express , MongoDB/Mongoose , OAuth . It's a practical application , a combination of workouts and healthy recipes to help users achieve their fitness goals . Users can also share and log their recipes and workouts . Additionally includes comments and currently working on creating an API containing a great diversity of recipes and workouts . Visit *True-Fitness*

Match Two Cards! | Created a functional Memory Card game with standard HTML, JavaScript, CSS **.** Building muscle memory , enjoy this humble game **.** Deck containing *12 cards* which are *shuffled* and placed face-down on the board . The players take turns to reveal two cards and check if they match. Click here to play *Match Two Cards*

Other Experience

Real Estate Sales Associates at Florida Homes Realty and Mortgage   **October 2021 - January 2023**

As a former real estate agent , I developed valuable skills in data and trend analysis making use of various software tools such as   Matrix , RPR , Remine Pro and many others . Leveraging analytical thinking and problem-solving to help clients make informed decisions when problems emerge on a transaction .

Communication skills also have been essential in understanding and meeting users' expectations , using applications like Zoom , Slack and Google Meet to collaborate with clients and colleagues seamlessly , even when working remotely . Which has honed my skills in teamwork and collaboration .

Incorporating CRM , FormSimplicity and other platforms to facilitate transactions and provide clients with personalized attention and support . Managing my time effectively , granted me to juggle multiple priorities and meet deadlines . I'm confident these skills will be instrumental in my success as a software engineer.

EDUCATION

General Assembly Software Engineering Immersive Program   **March 2023 - April 2023**
Remote Full Stack Web Development Program
FreeCodeCamp / JavaScript Algorithms and Data Structure Certification
